No. 53

RUSSIAN WINGS DRIVEN IN

The Japanese Commanders Envelope Both Russian Flanks while a Desperate Frontal Attack is Opened on their Centre.

London, March 6.—The battle now in progress is destined to alter the course of hostilities. The Japanese have scored a great success on the extreme east of the long line of battle, where General Kuroki has succeeded in driving in the Russian left and is now engaged in a wide turning movement, having as a main objective the railway north of Mukden after the fashion of Liao Yang, thus confronting Kuropatkin with the alternative of a disorderly retreat on the Japanese prepared defences at T's Pass or being cut off from his base at Harbin.

Gen. Kuropatkin is engaged in collecting his reinforcements for the purpose of reestablishing his left wing and of effectually checking Kuroki by cutting into a segment of his turning movement. To do this he has been obliged to weaken his left centre and the Japanese have seized the opportunity to make one of those desperate frontal attacks for which they are famous. At the same time Marshall Oyama has made an equally successful attempt to envelope the right of the Russian line towards Sannintin. These Russian positions have been turned and the right driven in on Mukden. The Japanese commanders are engaged in a supreme effort to crush Kuropatkin before he can be reinforced by two new army corps already mobilized and before spring breaks up and hampers extensive operations.

With a total frontage of ninety miles each army has been engaged for some months in determined efforts to outflank the others and it has been a question of which could admit of the widest extension without dangerously impairing the central defences. The release of 50,000 seasoned Japanese veterans by the fall of Port Arthur has given Marshall Oyama the whip hand. Never before in history have such vast arrays of troops confronted one another.

Gen. Kuropatkin may again extricate himself but so far the Japanese strategists have not made a single mistake and they always seem to exactly calculate the means necessary to the immediate objective. Marshall Oyama now relies on the success of Kuroki's movement, and his frontal attacks are designed rather to support the latter than to gain any immediate success against the Russian centre. Disaster to the Russian arms is written large over the reports from the front today.

Fighting near Mukden.

Bulletin Special.

Mukden, March 5rd.—The thunder of cannon is heard from all directions. The Putiloff and Novgorod hills are hidden by the smoke from the guns. The bombardment was resumed after the repulse of an infantry attack by the Japanese, a heavy bombardment is also in progress in the neighborhood of the Shakhe bridge apparently in preparation for an attack in that quarter.

St. Petersburg, March 3 (12.45 a.m.)—In a long dispatch from General Kuropatkin which was received yesterday, the commander in chief of the army in Manchuria gives details of various attacks by the Japanese the past few days and the Associated Press correspondent at Mukden in a dispatch received at midnight, indicates a continuation of the artillery duel, but neither reports throw any light upon the rumored intention of General Kuropatkin to withdraw northward, which has been the gossip of St. Petersburg for the last two days.

A despatch received last night concludes with this significant sentence "Within two weeks you may expect great events."

The Siberian railway is about to

BINDER TWINE DUTY.

We have heard from the lumbermen who want a duty of \$2.00 per thousand on the rough lumber used by the pioneer settler in the west. Also from the Ontario miller, who wants an export duty on North West wheat. Now comes the binder twine interest with a campaign for the imposition of a tax on that necessity of western farming. From time to time appear in the eastern press editorials under such headings as "A Vicious Octopus," "A Threatened Evil," and the like, in which the story is put up that the International Harvester Company, whose entry into the Dominion was welcomed with such acclaim a short time ago, is entering upon a fixed policy of putting out of business the Canadian binder-twine factories by selling cheap twine to the farmers, with the ultimate intention of raising the price of twine to the farmers after they have driven their competitors out of the twine business. And the farmers are exhorted, as the only remedy against this "vicious octopus" and "threatened evil" to prevent themselves from getting cheap binder-twine by demanding the imposition of a duty upon it.

These newspaper articles are so evidently written in the interests of the twine manufacturers that they are less likely to achieve their purpose than if their intent was not made plain.

The International Harvester Company is as much a Canadian as a United States institution. It has a factory in Canada, where it will operate on a large scale. An increase in the duty on binder-twine would be just as much in the interests of the International Harvester Company, operating in Hamilton, as it would be in those of the Massey-Harris Company, operating in Toronto, or of any binder-twine factories operating elsewhere throughout the Dominion. As far as can be learned to-day the binder-twine industry of Canada is a part of a combine which covers both Canada and the United States, and the demand for a duty in favor of Canadian twine is simply a demand to enable the Canadian end of the combine to take that much more out of the pockets of the farmers.

The plea of patriotism or loyalty that is being made brings to mind strongly Dr. Johnson's definition of the loyalty cry as the last resort of soundbreahe.

A year or two ago the attack on the tariff was led by the industries which already were receiving as much or more protection than they were entitled to. That having failed, the attack is now renewed on behalf of the industries which far good and sufficient reasons were not given the benefit of protective duties. The whole campaign, both of the past and present years, is based on the broad ground that the west is rich and doing well and can stand it.

EGG LAKE

Correspondence.

We are having a winter in marked contrast to that of Eastern Canada, according to newspaper accounts. The roads are quite bare in this section of the country and it does not freeze outside at night. Last night we had quite a heavy shower of rain, and to-day the weather looks like rain again.

To-day the Lyndells and Jos. Page went to Athabasca Landing with freight on wagons, and A. Beaudry and D. Cunningham have gone to Edmonton for more freight.

Dubuc's saw mill has just started operations in the bush north of the Springs.

Mr. Sutherland, who cut lumber last winter on the limits now being worked by McInnis and Lyons, camped on Tuesday night at Egg Lake.

On Sunday evening what might have been a serious accident occurred

Mr. T. J. Dwyer, with his wife and little boy, was returning home in a jumper, when one of the bolts holding the shafts became loose and fell out. Before the horse could be stopped, the shafts dropped at one side, striking him on the heels and causing him to run away. After running a few rods the jumper turned completely over throwing its occupants out in a heap on the snow. At the same time the shafts broke loose at the other side, and the horse dashed off alone. Fortunately no one was even slightly hurt, nor was any damage done beyond splitting off the dashboard of the jumper and breaking off the iron eye of one shaft. The horse with the shafts flying behind him, ran only about half a mile to the next house where he fell in trying to turn a corner in the yard, and was caught and put into the stable. Mr. and Mrs. Dwyer walked back to N. E. Logan's, which was less than a mile away.
March 1st, 1905.

Superfluous Hair

Removed by the New Principle

De Miracle

It is better than electricity, because it does not scar or produce a new growth. Better than X-ray, because it does not burn, scar or paralyze the tissues under the skin. Better than depilatories, because it is not poisonous; therefore, it will not cause blood poisoning, or produce eczema, which is so common with depilatories, and does not break off the hair, thereby increasing its growth.

Electrolysis, X-ray or depilatories are offered you on the bare word of the operators and manufacturers. DE MIRACLE is not. It is the only method which is indorsed by physicians, surgeons, dermatologists, medical journals and prominent magazines.

DE MIRACLE will be mailed to any address, sealed in plain wrapper for \$1. Your money back without question if it fails to do all that is claimed for it.

Our booklet—the most complete treatise on Superfluous Hair ever published—containing the testimonials of numerous physicians and surgeons and those of hundreds of others—will be sent free, in plain, sealed envelope, upon request. Write for it to-day to DE MIRACLE CHEMICAL CO., 23 QUEEN STREET WEST, TORONTO, or THE SIMPSON COMPANY LIMITED, TORONTO, ONT.

BULLETIN CO. (LTD.)

Our city has good water but good water can be made better, and Ross Bros. Ltd. have the thing to do it with. Have you seen their "Noxall Filter." It is the simplest Filter on the market, the most thorough and by a long ways the cheapest. Any family can afford one and they are made either for pressure to attach to your city water tap or gravity to filter from a pail or crock.

You Wouldn't Eat Dirt.

WHY drink it? Guard against disease and poison from impure water by using a

NOXALL

Germ Proof Water Filter

Positively removes all germs and impurities. It is quick-flowing, simple, compact, cleans in a minute and does not require frequent renewal.

CALL AT THE STORE FOR DEMONSTRATION

Ross Brothers, Ltd.

Following is one of the many testimonials that speak of the work done by these Filters:—

The Duquesne Chemical Laboratory.

Analytical Chemists and Chemical Engineers, Standard Bldg.,

531 Wood St. Pittsburg, Pa., April 12, 1897.

GENTLEMEN:—Following is the report on the samples of water taken from the regular city supply, and also after it had passed through the Tripoli filter. Two filters were tested in this manner one having just been started and the other having been in use four months. The chemical analysis, made to show animal and vegetable pollution, includes the amount of ammonia, albuminoid ammonia and oxygen required to completely destroy such pollution. The bacteriological analysis is a count of the total number of living microbes in ten ordinary drops of water. This test was repeated in duplicate in case of the filtered samples. The results obtained on analysis are as follows:

Water from hydrant.	From old filter.	From new filter.
Ammonia	0.03	0.02
Albuminoid Ammonia	0.20	0.09
Oxygen Consumed	1.64	0.56

The figures represent parts of the impurities in one million parts of water. On cultivation, the hydrant water showed 890 bacteria in ten drops. That from the old filter 0, 2 and 4 in three tests, and from the new filter 3, 3 and 7. The above shows that the number of living microbes present has been reduced **99.6 per cent.**; the ammonia is reduced 39 per cent.; the albuminoid ammonia 57 per cent., and the oxygen consumed 64 per cent. by passing through the filter, making the originally very bad water equal in cleanliness and purity to the best spring water. These results cannot be surpassed by any system of filtration with which we are familiar.

Respectfully submitted,

W. E. GARRIGUES CHIEF CHEMIST AND MANAGER.

99.6 per cent. of living microbes eliminated by use of the filter.

The price is from \$3.00 up, the \$3.00 one fits on to any house tap and can be removed in two seconds. They are stone Filters and the stones can be cleaned as easily as any glass tumbler or delf cup. The Gravity filters are only \$4.50 and readily filter water from a pail into any other vessel placed to receive the filtered water. They are small and can be easily packed in a very small space to carry from place to place.

The above is correct cut of the Tap Filter, showing it in operation.

The above is correct cut of the Gravity Filter, showing it in operation.

1905 1904 only be had in Alberta from ROSS BROS., who are Sole Agents. The Trade supplied.

A BIG ROOMY SHIRT

No other workman's shirt is made so big or comfortable or so strongly as the H.B.K. Big Shirt.

Not a skimpy, factory-made, cheap shirt but a shirt made of honest material and lots of it. As big and easy fitting as the ones your mother used to make with three yards and a half of goods. Every H.B.K. Big Shirt has three and a half to three and three quarter yards of material.

Ample room under the armpits, broad and spacious on the shoulders, full and long bodied, big sleeves, an easy wearing shirt and a long wearing shirt.

Every shirt is branded with this brand and guaranteed by the makers.

THE GUM REMOVED

THE microscope shows each leaf of tobacco is covered with long soft hairs which exude a viscid juice.

This is called the gum, and it covers the surface with a moist glutinous exudation.

Tobacco, to be good, must have all this gum driven out.

In Manicragua I procure tobacco that has all this gum "sweated" by the natural heat of the climate.

Only the dry, well matured leaf remains—the leaf that when I age for three years will give a cool, fragrant smoke—odorous and aromatic—that's the characteristic odor of my Pharoah.

KING MURDER TRIAL.

INDIANS AND SETTLERS GIVE EVIDENCE.

Defence Tries to Shake Medical Evidence.

King's trial was resumed this morning in the Supreme Court. The case is chronicled in last Saturday's edition. One of the jurymen was taken sick at noon of that day. The court assembled at two o'clock, but Mr. Caruthers being still ill, the hearing was adjourned until ten o'clock this morning. All jurors being present, the hearing was resumed with the Indian, Francis Kisenis in the witness box. His testimony was merely a corroboration of the story of Edward Misineanap. The two were employed in mudding up the house of the latter one day last fall. "In the month when the moose pairs off," (September) when two white men passed close by where they were at work. Witness knew nothing further about them except that they had several pack horses and a dog with them. In the cross-examination the witness stated that he was at the mudding only two days, while the evidence given by Edward Misineanap was that they were at the work a week.

Casimir Cardenas, another Cree Indian, was next called and narrated the circumstances of a white man coming to his house on horseback one day last fall and securing the services of his two sons in the search of some horses which had been lost. The white man came into the house and he noticed that he wore very peculiar boots, such as he had never seen before, they having lots of white metal on them. These boots were produced and identified by witness. Cardenas went on to tell about Sergeant Anderson's visit to his place some time later, but he was absent. He identified Hayward by picture, picking the same out of a large number of pictures given him. Also the dog and collar.

Jas. K. Cornwall, a Trader from Lesser Slave Lake, was the next witness called. His testimony, although considerably broken up by his not being very definite in regards to his data, was to the effect that he first met King on the road between his own store and that of the Hudson Bay Co.'s post. King was accompanied by Geo. Moran, a settler of that country, and he had a friend with him. They all shook hands and were made acquainted with each other, by which circumstance he learned King's name. "A day or two later King came to my store and made some trifling purchases, nothing more than more commonplace passed between us this time, but I was at work a few days later when an Indian came to me and wished that I should go down about a quarter of a mile from my store with him and act as an interpreter between a white man, who had some traps to sell, and himself. This I could not do at the time, but when an Indian came into my store later stating that he thought a man had been killed and dismembered over on the reserve, I became interested, although not believing it to be so. However, I went down to King's camp and asked what he would take for his traps. He asked a dollar a piece for them, which I thought too much, but told him to bring them up to the store and we would make a bargain. I asked him why he wanted to sell his outfit, as he had told me he did and he replied that he had gone broke in the purchase of the same and as he didn't see much prospect of where this winter. Said he had a partner with him that he had picked up on the trail, but that he had left going to British Columbia by the Sturgeon Lake trail. Said he didn't know the name of this man or anything about him. The next day he came up to the store and I bought his traps, giving him \$51 for the same. From some conversation I heard in the store I went over to the deserted camp-fire later and while there found caked in a clump of bushes an axe-head with some charred wood in the hole. This was all covered with dirt and leaves, being within about twenty feet of the ashes of the fire. This axe-head, identifying one exhibited. I later gave to Sergeant Anderson.

In the cross-examination the witness testified that there was an old campsite at the former camp of the man King and his partner, and that in all probability it was two or three years old. That these camps were usually built at camp sites. The testimony of witnesses testimony was that the different trails leading out of Lesser Slave Lake settlement and leading same upon a map of that country in evidence. In this testimony that which probably had the

most direct bearing on this case was the statement that there were three different, often used, trails that one could take to go to Sturgeon Lake from the reserve, and that the Swan Hill trail was the most frequently used in going to or coming from Edmonton. Mr. Cornwall located the residence of twenty-one families who live on the reserve and it was estimated that there were about 69 Indians who made their homes in these 21 families.

The Big Store

A SHOE STORY

Owing to the immense stock we carry it is impossible to give any definite idea of the qualities and values we offer in any single advertisement. Except we charter the newspaper. We therefore intend to talk about one or two lines each week.

Keep an eye on our Shoe Space. It will contain interesting news. Also, don't fail to see our Shoe Stock. It is our business to show you, and the confidence we have in our stock makes it a pleasure to show it. Your visit will be time profitably spent.

The ART SHOE for Ladies

This is the debut of this shoe in Edmonton and it is up-to-date in every particular. The prices of this line range from \$2.75 to \$6.00. The colors are Champagne Willow and Black in both Oxfords and Bala.

The soles this season are lighter, turns and McKays being most popular. The heels are smaller as a rule, but we have both styles in this line.

You'll want a fine shoe before long. Don't buy it without first seeing

RE CATTLE FOR MARKET.

Editor Bulletin,

Dear Sir:—On reading the Bulletin issue, dated 3rd inst., I saw an article in it copied from the Daily Mail, London, which pleased me. I drew the attention of the Bulletin readers some time ago to the necessity of having a fat stock show held here to educate the farmers as to what quality and condition of animals was required to satisfy the taste of the consumer in those countries where our produce is needed and we don't want to forget that there is a heavy competition there. Our common runs won't do.

The first thing that is needed is to educate the producer as to what is needed and the benefit to be gained by producing the right article.

Now I have been watching the stockmen of Edmonton country closely for the last three or four years and I see it is possible for them to get a move on, and there has been a large move got on for the last three years in the direction of bettering their stock.

The market is coming our way and the question is have we the right article. The inquirer in this article wants to know if a carload a week could be supplied, surely that would be within our reach.

Now what do we see? Men from Southern Alberta going through our country buying two year old steers from fifteen to seventeen dollars, and yearlings from six to ten. Does that pay? I don't think so.

Our Edmonton fair has been a great education in what is needed. What information we got has told and is telling for the good of town and country.

Yours respectfully,
T. DALY.

Synopsis of Regulations for Disposal of Minerals on Dominion Lands in Manitoba, the Northwest Territories and the Yukon Territory

Coal.—Coal lands may be purchased at \$10 per acre for soft and \$20 for anthracite. Not more than 320 acres can be acquired by one individual or company. Royalty at the rate of 10 cents per ton of 2000 pounds shall be collected on the gross output.

Quartz.—Persons of eighteen years and over and joint stock companies holding free miners' certificates may obtain entry for mining location.

A free miner's certificate is granted for one or more years, not exceeding five, upon payment in advance of \$750 per annum for an individual, and from \$50 to \$100 per annum for a company, according to capital.

A free miner, having discovered mineral in place, may locate a claim 1,500 by 1,500 feet by marking out the mine with two legal posts bearing location notices, one at each end of the line of the lode or vein.

The claim may be recorded within fifteen days if located within ten miles of a mining recorder's office, one additional day allowed for every additional ten miles or fraction. The fee for recording a claim is \$5.00.

At least \$100 must be expended on the claim each year or paid to the mining recorder in lieu thereof.

When \$500 has been expended or paid the locator may, upon having a survey made, and upon complying with other requirements purchase the land at \$100 per acre.

Permission may be granted by the Minister of the Interior to locate claims containing iron and mica, asbestos, copper, in the Yukon Territory, of an area not exceeding 160 acres. The patent for a mining location shall provide for the payment of royalty on the sales not exceeding five per cent.

Placer Mining, Manitoba and the N. W. T., excepting the Yukon Territory. Placer mining claims are generally 100 feet square, entry fee \$5.00, renewable yearly. On the North Saskatchewan river claims for either bar or beach, the former being 100 feet long, and extending between high and low water mark. The latter includes bar diggings but extends back to the base of the hill or bank but not exceeding 1,000 feet. Where steam power is used, claims 200 feet wide may be obtained. Dredging in the rivers of Manitoba and the N. W. T., excepting the Yukon Territory.—A free miner may obtain only two leases of five miles each, for a term of twenty years, renewable in the discretion of the Minister of the Interior.

The lessee's right is confined to the submerged bed or bars of the river below low water mark, and subject to the rights of all persons who have or who may receive entries for bar diggings on bench claims, except in the Saskatchewan river, where the lessee may dredge to high water mark on each alternate leasehold.

The lessee shall have a dredge in operation within one season from the date of the lease for each five miles, but where a person or company has obtained more than one lease, one dredge for each fifteen miles or fraction, will be sufficient. Rental \$10 per annum for each mile of the river leased. Royalty at the rate of two and a half per cent, collected on the output after it exceeds \$10,000.

Dredging in the Yukon Territory.—Six leases of five miles each may be granted to a free miner for a term of twenty years, also renewable.

The lessee's right is confined to the submerged bed or bars in the river below low water mark, that boundary to be fixed by a position on the first day of August, in the year of the date of the lease.

The lessee shall have one dredge in operation within two years from the date of the lease, and one dredge for each five miles within six years from such date. Rental, \$100 per mile for first year, and \$10 per mile for each subsequent year. Royalty same as placer mining.

Placer Mining in the Yukon Territory.—Creek, gulch, river and hill claims shall not exceed 250 feet in length measured on the base line or general direction of the creek or gulch, the width being from 1,000 to 2,000 feet. All other placer claims shall be 200 feet square.

Claims are marked by two legal posts, one at each end, bearing notices. Entry must be obtained within ten days of the claim is within ten miles of a mining recorder's office. One extra day allowed for each additional ten miles or fraction.

The person or company staking a claim must hold a free miner's certificate. The discoverer of a new mine is entitled to a claim of 1,000 feet in length, and if the party consists of two, 1,500 feet altogether, on the output of which no royalty shall be charged, the rest of the party ordinary claims only.

Entry fee, \$10. Royalty at the rate of two and one-half per cent, on the value of the gold shipped from the Yukon Territory to be paid to the Comptroller. No free miner shall receive a grant of more than one mining claim on each separate river, creek or gulch, but the same miner may hold any number of claims by purchase, and free miners may work their claims in partnership by filing notices and paying fee of \$2.00. A claim may be abandoned and another obtained on the same creek, gulch or river by giving notice and paying a fee.

Work must be done on a claim each year to the value of at least \$200.

A certificate that work has been done must be obtained each year; if not, the claim shall be deemed abandoned, and open to occupation and entry by a free miner.

The boundaries of a claim may be defined absolutely by having a survey made, and publishing notice in the Yukon Official Gazette.

Hydraulic Mining, Yukon Territory.—Locations suitable for hydraulic mining, having a frontage of from one to five miles, and a depth of one mile or more, may be leased for twenty years, provided the ground has been prospected by the applicant or his agent; is found to be unsuitable for placer mining, and does not include within its boundaries any mining claims already granted. A rental of \$150 for each mile of frontage and royalty at the rate of two and one-half per cent, of the value of the gold shipped from the Territory are charged. Operations must be commenced within one year from the date of the lease, and not less than \$5,000 must be expended annually. The lease includes all base metals, quartz and coal, and provides for the withdrawal of unopened land for agricultural and building purposes.

Petroleum.—All unappropriated Dominion lands in Manitoba, the Northwest Territories and within the Yukon Territory, are open to prospecting for petroleum, and the Minister may reserve for an individual or company having machinery on the land to be prospected an area of 640 acres. Should the prospector discover oil in paying quantities, and satisfactorily establish such discovery an area not exceeding 640 acres, including the oil well and such other land as may be determined, will be sold to the discoverer at the rate of \$1.00 an acre, subject to royalty at such rate as may be specified by order-in-council.

Mr. Theo Yerex is taking a load of grain to Vegerville this week. The weather is very mild, seeding will commence next week.

EARN A

Comfortable Living
WITH A
Chatham Incubator

Poultry raising with a Chatham Incubator is a very profitable and easily managed occupation. Unless you wait to go into it extensively it need take but very little of your time. Government reports show that the demand for chickens in Canada is greatly in excess of the supply and Great Britain is always clamoring for more. That means a steady market and good prices for chickens.

You cannot raise chickens successfully with a setting hen. She is wasting time setting when she should be laying. While she is hatching and brooding a few chickens she could be laying five or six dozen eggs. The percentage of chickens she hatches is much less than that produced by the Chatham Incubator.

It will pay you to own a Chatham Incubator.

Chatham Incubators contain every improvement of importance in incubator construction that has been produced. They are made of thoroughly seasoned wood, with two walls, case within case. Between these walls mineral wool is packed forming the very best insulation. Each piece of the case is mortised and grooved and screwed, making the whole as solid as a rock. Chatham Incubators are equipped with scientifically perfect regulators which are an infallible means of regulating the temperature.

No cash to pay until
October, 1905.

We will start you raising poultry for profit with a Chatham Incubator without one cent of money from you until next Fall. That means that you can take off seven or eight hatches and make considerable money out of the incubator before the first payment becomes due.

We couldn't make this offer if we were not certain that if you accept it you will get complete satisfaction, if we were not positive that the Chatham Incubator will pay you a handsome yearly income.

This is a straightforward offer. We make it to show our supreme confidence in the Chatham Incubator. We want you to accept this offer as we are sure of the satisfaction our incubator will give. Every machine we have put out so far has made other sales in the same neighborhood.

Our offer is to send you a Chatham Incubator at once, freight prepaid by us without one cent of cash from you. You make your first payment in October, 1905. The balance to be paid in October, 1906, or if a Cash Buyer you get it cheaper. Could any offer be fairer or more generous?

Write us to-day for full particulars of our offer and mention this paper. Don't put it aside for another time as this special proposition may be withdrawn at any time.

The Canadian Northwest
Homestead Regulations

Any even numbered section of Dominion Lands in Manitoba, or the Northwest Territories, excepting 1 and 23, which has not been homesteaded, or reserved to provide wood lots for settlers, or for other purposes, may be homesteaded upon by any person who is the sole head of a family, or any male over 18 years of age to the extent of one quarter section, of 160 acres, more or less.

ENTRY.—Entry may be made per the district in which the land to be taken is situated, or, if the homesteader desires, he may, on application to the Minister of the Interior, Ottawa, the Commissioner of Immigration, Winnipeg, or the local agent for the district in which the land is situated, receive authority for some one to make entry for him. A fee of \$10.00 is charged for a homestead entry.

HOMESTEAD DUTIES.—A settler who has been granted an entry for a homestead is required by the provisions of the Dominion Lands Act and the amendments thereto, to perform the conditions connected therewith, under one of the following plans:

(1) At least six months' residence upon and cultivation of the land in each year during the term of three years.

(2) If the father (or mother, if the father deceased) of any person who is eligible to make a homestead entry under the provisions of this Act, reside upon a farm in the vicinity of the land entered for by such person as a homestead, the requirements of this Act as to residence prior to obtaining patent may be satisfied by such person residing with the father or mother.

(3) If a settler has obtained a patent for his homestead, or a certificate for the issue of such patent, countersigned in the manner prescribed by this Act, and has obtained entry for a second homestead, the requirements of this Act as to residence prior to obtaining patent may be satisfied by residence upon the first homestead, if the second homestead is in the vicinity of the first homestead.

(4) If the settler has his permanent residence upon farming land owned by him in the vicinity of his homestead, the requirements of this Act as to residence may be satisfied by residence upon said land.

The term "vicinity" used above is meant to indicate the same township or an adjoining or cornering township.

A settler who avails himself of the provisions of Clauses 2, 3, or 4, must build a house of 1000 sq. ft. with buildings for their accommodation, cultivate 30 acres of his homestead, and have besides 80 acres substantially fenced.

The privilege of a second entry is restricted by law to those settlers only who completed the duties upon their first homesteads to entitle them to patent on or before the 2nd June, 1899.

Every homesteader who fails to comply with the requirements of the homestead law is liable to have his entry cancelled, and the land may be again thrown open for entry.

Application for patent should be made at the end of three years, before the local agent, sub-agent, or Homestead Inspector. Before making application for patent the settler must give six months' notice in writing to the Commissioner of Dominion Lands at Ottawa, of his intention to do so.

Information.—Newly arrived immigrants will receive at the Immigration Office, in Winnipeg, or at any Dominion Lands Office, in Manitoba, or the Northwest Territories, information as to the lands that are open for entry, and from the officers in charge, free of expense, advice and assistance in securing land to suit them. Full information respecting the land, timber, coal and mineral laws, as well as respecting Dominion Lands in the Railway Belt in British Columbia, may be obtained upon application to the Secretary of the Department of the Interior, Ottawa, the Commissioner of Immigration, Winnipeg, Manitoba, or to any of the Dominion Lands Agents in Manitoba or the Northwest Territories.

W. W. CORY,

Deputy Minister of the Interior.

N.B.—In addition to Free Grant Lands to which the regulations above stated refer, thousands of acres of most desirable lands are available for lease or purchase from railroad and other corporations and private firms in Western Canada.

To your advantage

Special Values in Toilet Sets

Prices from \$3.00 per set, in different designs and shades

We Will Buy

A 50c. Bottle of Liquezone and Give it to You to Try.

We want you to know about Liquezone, and the product itself can tell you more than we. So we ask you to let us buy you a bottle—a full-size bottle—to try. Let it prove that it does what medicine cannot do. See what a tonic it is. Learn that it does kill germs. Then you will use it always, as we do, and as millions of others do.

This offer itself should convince you that Liquezone does as we claim. We would certainly not buy a bottle and give it to you if there was any doubt of results. You want those results; you want to be well and to keep well. And you can't do that—nobody can—without Liquezone.

We Paid \$100,000

For the American rights to Liquezone. We did this after testing the product for two years, through physicians and hospitals, after proving, in thousands of different cases, that Liquezone destroys the cause of any germ disease.

Liquezone has, for more than 20 years, been the constant subject of scientific and chemical research. It is not made by compounding drugs, nor with alcohol. Its virtues are derived solely from gas—largely oxygen gas—by a process requiring immense apparatus and 14 days' time. The result is a liquid that does what oxygen does. It is a nerve food and blood food—the most helpful thing in the world to you.

Its effects are exhilarating, vitalizing, purifying. Yet it is a germicide so certain that we publish on every bottle an offer of \$1,000 for a disease germ that it cannot kill. The reason is that germs are vegetables; and Liquezone—like an excess of oxygen—is deadly to vegetable matter.

There lies the great value of Liquezone. It is the only way known to kill germs in the body without killing the tissue, too. Any drug that kills germs is a poison, and it cannot be taken internally. Every physician knows that medicine is almost helpless in any germ disease.

Germ Diseases.

These are the known germ diseases. All that medicine can do for these troubles is to help Nature overcome the germs, and such results are indirect and uncertain. Liquezone attacks the germs, wherever they are. And when the germs which cause a disease are destroyed, the disease must end, and forever. That is inevitable.

50c. Bottle Free.

If you need Liquezone, and have never tried it, please send us this coupon. We will then mail you an order on a local druggist for a full-size bottle, and we will pay the druggist ourselves for it. This is our free gift, made to convince you; to show you what Liquezone is, and what it can do. In justice to yourself, please, accept it to-day, for it places you under no obligation whatever.

Liquezone costs 50c. and \$1.

CUT OUT THIS COUPON

For this offer may not appear again. Fill out the blanks and mail it to The Liquezone Company, 127-129, Wabash Ave., Chicago.

My disease is _____
I have never tried Liquezone, but if you will supply me a 50c. bottle free I will take it.

Give full address—write plainly.

Any physician or hospital not using Liquezone will be gladly supplied for a test.

EDMONTON ALTA. CANADA

POPULATION, 7,500

CITY GOVERNMENT:—

Mayor, K. W. MacKenzie; Aldermen, C. May, K. A. McLeod, W. H. Clark, D. R. Fraser, J. R. Boyle, T. Bellamy, J. H. Picard, W. A. Griesbach.

Conveniences:—Waterworks, sewer systems, telephone system, electric lighting system, all owned and operated by the city.

Board of Trade:—President, J. H. Morris, Secretary, F. F. Tims.

Immigration Officer:—C. W. Sutter.

Educational Institutions:—Public and separate schools, high school, Alberta College.

CHURCHES:—Roman Catholic, Anglican, Presbyterian, Methodist, Baptist, German Baptist, Lutheran, Salvation Army.

TRAIN SERVICE:—Leaves for Strathcona 7.45 and 15.30. Arrives from Strathcona 9.15 and 11.50.

LOCAL

—Train on time.

Prof. Hutchings came up from Calgary on Saturday.

—The council of the board of trade meet this afternoon.

—A. O. F. members are requested to meet in their hall Thursday evening.

—Services will be held in St. Joseph's church on Ash (Wednesday) morning.

—Sons of England, Lodge No. 225 meet in regular session in Unity Hall Sandison block to-night.

—The annual district Epworth League convention will be held in city on the 15th and 16th inst.

—The river is reported to be open below Fraser's mill for a considerable distance.

—Rev. Kieby, of Calgary, lectures in McDougall Methodist church tomorrow evening.

—The ground is being cleared for the new brick block opposite the Bank of Montreal.

—Sutherland played goal for the Edmonton juniors in their game with Calgary, not Matheson, as previously reported.

—The Masons who went to Leduc to attend the funeral of the late A. R. Glanville, returned on Saturday evening.

—A very successful sale of thoroughbred cattle was conducted at J. McPherson's farm, Sprucegrove, last week, by W. Smith, auctioneer.

—A slight flurry of snow occurred yesterday morning and the day was cloudy throughout. This morning broke clear again and today is quite warm.

—Word has been received in the city of the death near Lucknow, Ont., of Mrs. McKenzie, mother of Mayor McKenzie and Mr. J. McKenzie, of the customs office, Edmonton.

—A Leduc correspondent of the Strathcona Plaindealer suggests that an effort be made to induce F. Oliver M. P. to enter provincial politics as the Liberal leader.

—Leduc Enterprise:—Mrs. Townsend left for the General Hospital at Edmonton, on Saturday last. Dr. Little accompanied her. For some time Mrs. Townsend has been physically declined. Dr. Nichols is now her attending physician.

—The annual immigration excursion began on Friday last when prospective settlers for Canada left all parts of the United States for Canada. Those coming to Edmonton should reach here about the 15th. From the information received Immigration Agent Sutter expects a large number of the new comers to settle in this district.

—The Baptists of Strathcona are to be heartily congratulated on the completion of their handsome new place of worship. (They have now the finest church in the town. Dedication services were held yesterday when large congregations filled the church to overflowing. Specially prepared selections were given by the choir in which they were assisted by other local talent. Rev. Mr. McDonald, of Edmonton, delivered an excellent sermon in the morning, and Dr. McDonald conducted the evening service. The collections in aid of the building fund were very liberal. In the morning the Methodist church was closed to permit its members to join the Baptist friends, and in the evening the same was done by the Presbyterians. Further interesting demonstrations will take place in the church this Monday evening.

BACK FROM THE EAST.

Mr. August Lessard returned on Saturday from a three months' visit to points in Eastern Canada and the New England states. The weather in the east has been exceptionally cold all winter and the snow very deep. At North Bay on the way west the mercury registered 25 below. From Winnipeg west the weather was warm. Snowing was going on at many points, and seeding was expected to begin this week about the C. & E. People in Eastern Canada are very deeply interested in Western Canada and the immigration movement during the summer will probably be very heavy.

Wall
Paper

For Season 1905.

No previous collection has contained such attractive features as that we now ask you to call and examine; it is the cream of the celebrated product of the

Watson Foster Co., Ltd.,
Montreal.

We have bright, pretty florals and stripes for chambers; magnificent hall, dining-room, store, and office decorations; and a wide choice of very beautiful

Parlor Hangings

in soft shades of creams, greens, blues, etc., with silver and gilt treatment.

Altogether, our range outclasses any previous offerings in value and effect.

Our cheap papers are good and our good papers are cheap.

So if you have any walls not recently papered, let us show you how easy it will be to produce a beautiful result at comparatively small expense.

We have procured the services of Mr. A. Desilets, an expert at paper hanging, who will guarantee any work entrusted to him.

Leave your orders with us, and we will do the rest.

Don't forget that we are headquarters for all kinds of
House Furnishings.
